

Table A – Results of Internal Review Committee

Date of Review/Recommendation: September 20, 2007

Water Body Under Evaluation:

Water Body ID #: 0083 (also see North River, WBID 3703)
Name: North River (Class C)
Length of Segment: 12.8 miles
County(ies): Knox, Shelby

Use Attainability Analysis (UAA) Study:

UAA ID #: 0017
Submitter: MEC Water Resources, Inc.
Date(s) Conducted: May 18, 2007
Date Received: June 4, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments: The UAA survey was conducted in May 2007 and no WBCR was observed.
No interviews were conducted during the survey.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: This stream was divided into two sub-segments in the Nov. 2005 Water Quality Standards (WQS). The lower sub-segment was assigned WBCR, but the upper was not. Four of the nine sites evaluated in this UAA (#s 1 – 4) were on the upper sub-segment, WBID 3703 (see separate Internal Review Committee Recommendation). The remaining five sites (#s 5 – 9) were on the lower sub-segment, WBID 83.

The stream met the maximum depth criterion at 3 of the 5 sites evaluated on WBID 83. Due to meeting the maximum depth criterion, the committee recommends the WBCR use designation be retained on this sub-segment.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive

Committee Members: Jill LeRoy, Donna Menown, Anne Peery
